Re: MaxPreps 2016-2017

Date: July 27, 2016

=====
First and foremost, thank you for your diligent effort to adjust to the MaxPreps platform as our first point of entry for schedules and scores this past year. Your efforts did not go unnoticed by this office. Beginning in the 2016-2017 season, coaches of the eight power ranking sports (volleyball, football, boys and girls basketball, girls and boys soccer, softball and baseball) will be using the LHSAA platform as first point of entry for schedules and scores. The LHSAA and MaxPreps have come to this agreement/change with one major stipulation, coaches/or designee will enter their stats into the MaxPreps platform immediately following the entry of their score into the LHSAA member site. As many of you already know, MaxPreps has a proven statistical model and has partnered with over 65 stat partners including iScore, Hudl and GameChanger. We will continue to partner with the leading company in the nation to manage this statistical data. In addition, we will be working with MaxPreps to display team information for our non-power ranking sports. They can now have their schedules, rosters and team photos displayed publicly for “display purposes only” in promoting these sports.

Again, thank you and we appreciate your input and continued efforts with the LHSAA.

LHSAA... Beyond the Game
