In order to bring the Louisiana High School records to a current status, the old records had to be abolished. The reason for this was because of inconsistencies that occurred when new classes were created in the past. In 1955, Class 3A was created and all events that year became new records for that class. In 1971, Class 4A was created and the existing class records were moved up to the higher class, leaving Class C with no records. All events in Class C that year became new records. In 1992, Class 5A was created and all existing records were not elevated to the higher class so all events became new records in Class 5A that year.

To correct the records, all records that were moved up to the higher classification in 1971, were returned to the class in which the record was set. With records obtained by Louisiana Track and Field Report, all meets prior to 1980 were yards and were converted to hand time. All meets after and including 1980 were metric and were converted to F.A.T.
